

Denmark

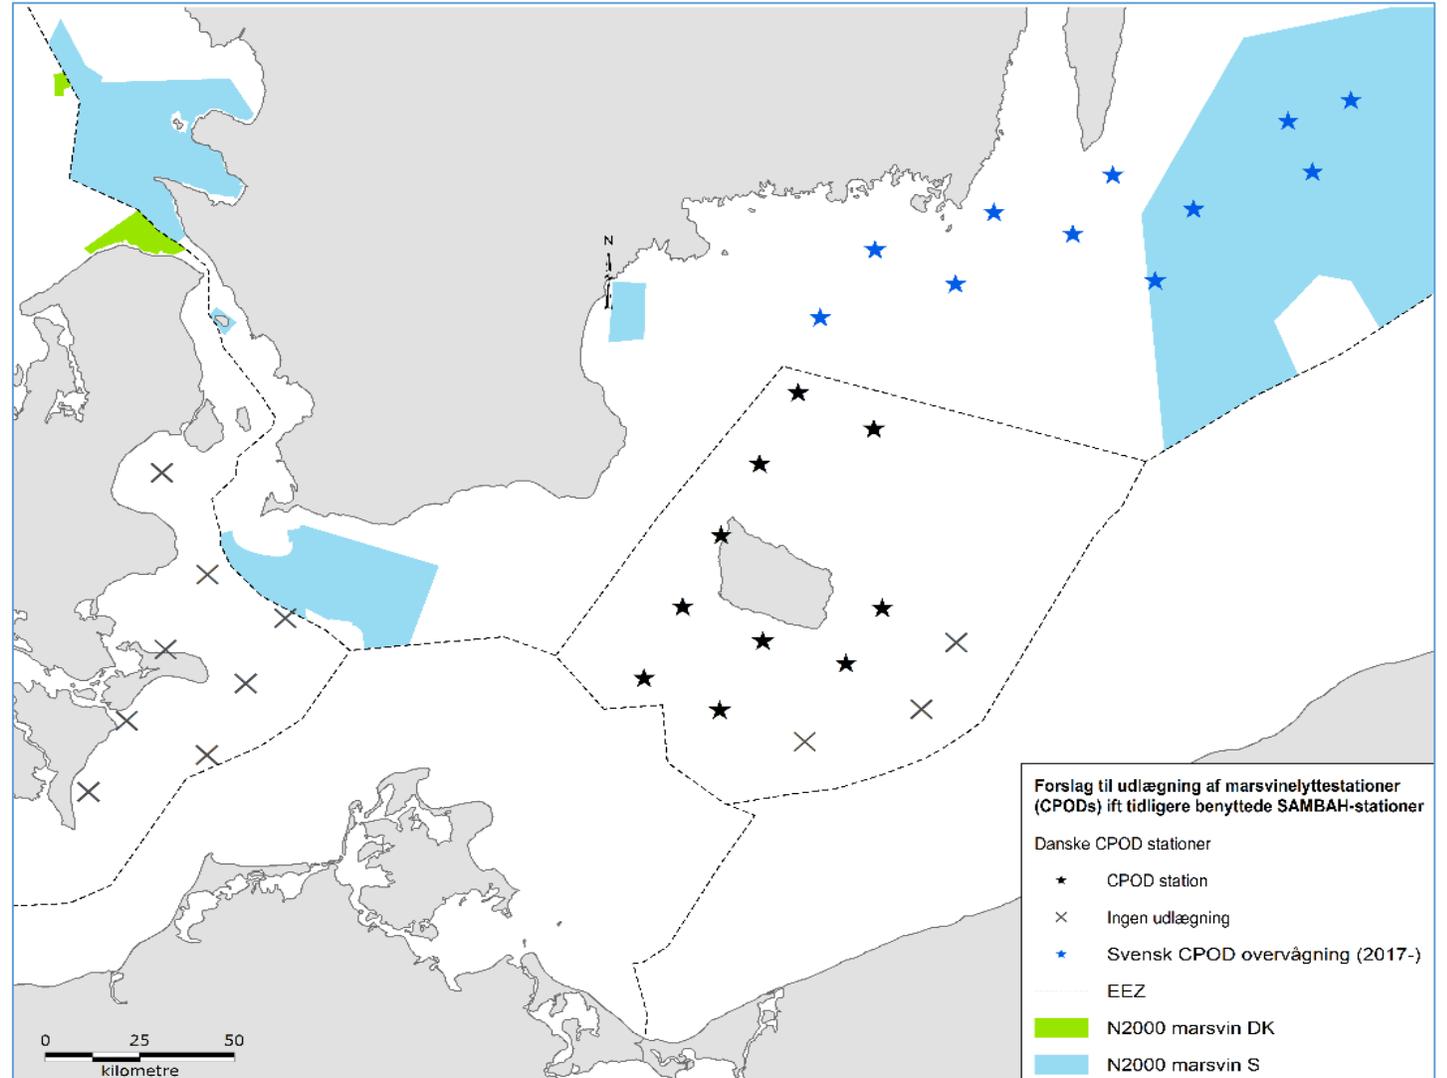

Progress in relation to the Jastarnia Plan and the Belt Sea Plan
Environment

Jastarnia Plan

The Nature Agency has initiated monitoring of the Baltic population under MFSD

10 CPOD stations

June 2018 – June 2019

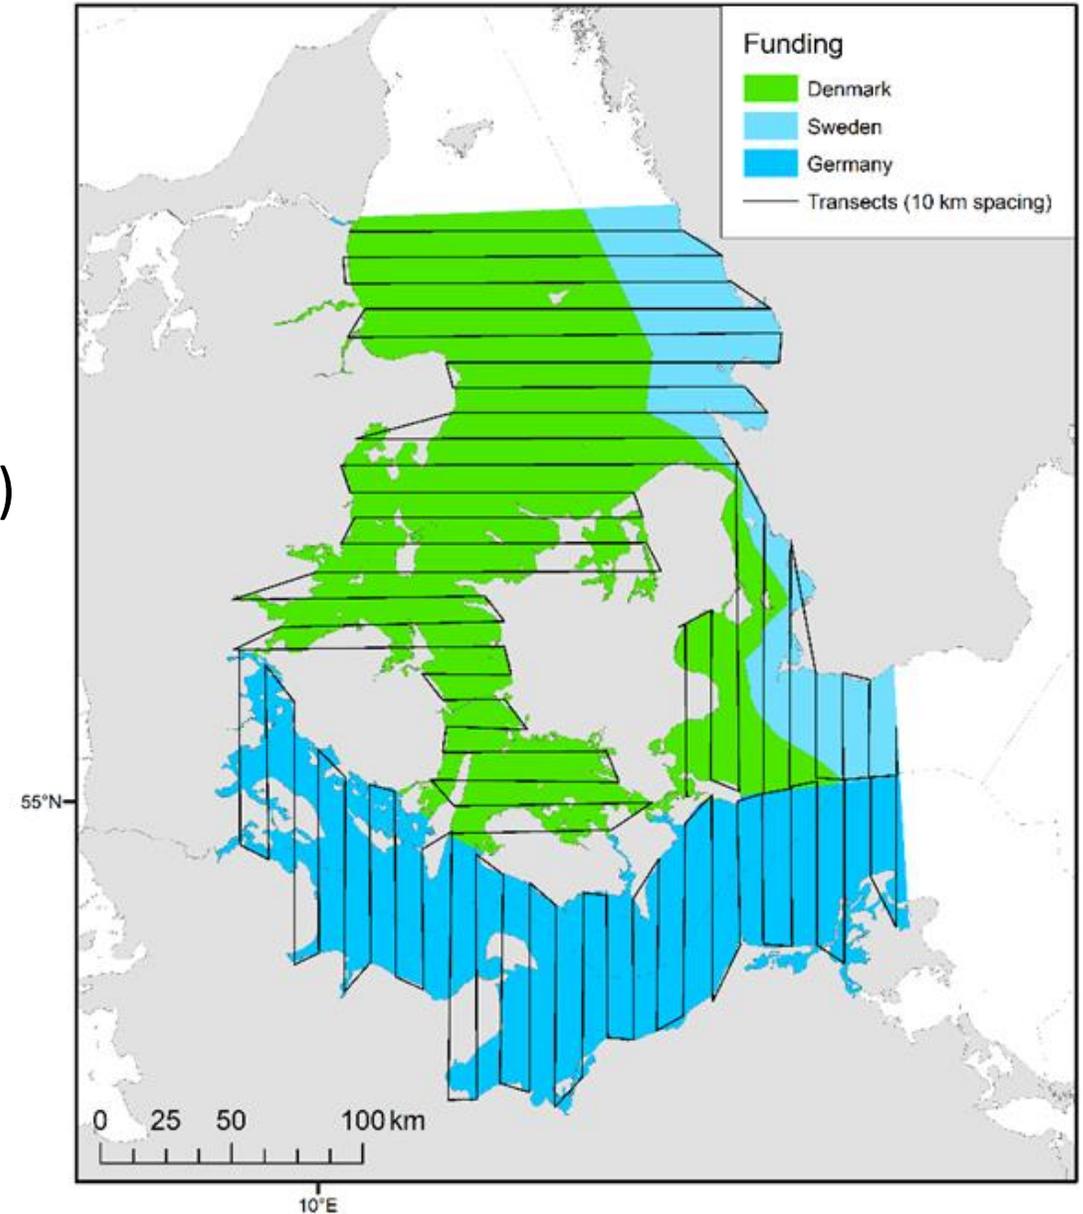

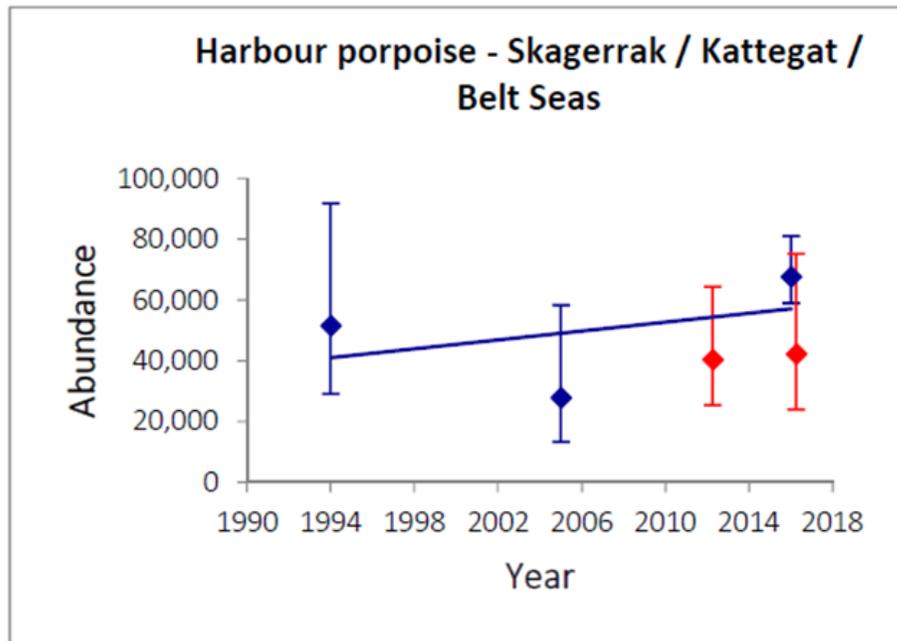

Belt Sea Plan

Monitoring 2011-2016 ended:

- CPODs, acoustic surveys, MiniSCANS

New period begun 2017-2021

- CPODs, MiniSCANS-II (2019, cofunded by Denmark, Germany and hopefully Sweden)

Belt Sea Plan

Monitoring 2011-2016 ended:

- CPODs, acoustic surveys, MiniSCANS

New period begun 2017-2021

- CPODs, MiniSCANS-II (2019, cofunded by Denmark, Germany and hopefully Sweden)
- Development of the HELCOM indicator for distribution and abundance of harbourporpoises
- Continued research (satellite tracking) in porpoises and antropogenic effects e.g. noise, vessel traffic, wind farms a.s.o.
- Improved analysis of CPOD data (power analysis, seasonal changes)
- update of model of the Belt Sea population
