

3.4. Update from CMS

Jenny Renell
JG16, Day 2

Relevant outcomes from CMS COP13

- No new resolutions specifically related to marine mammals
<https://www.cms.int/en/documents/cop-resolutions>
- Decisions adopted related to IMMAs, marine noise, bycatch, aquatic wild meat, marine wildlife watching, live capture, global POW for Cetaceans, animal culture and social complexity, etc.
<https://www.cms.int/en/documents/decisions/cop13>
- CA13.7 for the Harbour Porpoise in the Baltic Sea and the Iberian Peninsula: <https://www.cms.int/en/documents/concerted-actions>

Relevant action points from AC25

20. The Advisory Committee reconfirms its desire to see proposals submitted to CMS COP14 (2023) to list the Baltic population of the Harbour Porpoise on Appendix I and the Iberian population on Appendix I and II, and **urges interested Parties to submit the proposals** well in advance of the EU internal deadline.

→ **Action Point?** [regarding follow up]

21. The text of the CMS species listing proposal for the Harbour Porpoise and Iberian populations in the Baltic to be listed in CMS Appendices **should be discussed in AC26** (scheduled for 2021).

→ **Action Point?** “**Listing proposal to be considered by JG17, before AC26**”
[listing proposal should be shared with all RS for consultations, by the Proponent]

NB. CMS Res.13.7 *Guidelines for preparing and Assessing Proposals for the Amendment of CMS Appendices*
